🌐 lenix.dev 🐙 github.com/jonahmr1

Summary

Self-taught software engineer with a track record of shipping real, production-grade products across game servers, web, mobile, and AI systems. Obsessed with performance, architecture, and building things that actually work.

6k+ commits in the last 12 months, 20+ production-ready products, and developed the #1 and #3 most globally downloaded FiveM packages on NPM; zero tutorials followed.

Currently building Sysenix, a local-first AI system agent that gives users complete intelligence over their own machine.

Experience

Lenix Studio

2024 - 2026-02

Founder

Ran a software consultancy serving 20+ clients and 500+ members worldwide. Delivered full-stack game server end-to-end builds, custom mechanics, server troubleshooting and mentoring new developers.

Projects

Sysenix: AI System Agent

2026 - present

Cross-platform system agent that watches, understands, and controls your machine using local AI vision. Features tracker, executor, and natural language controller layer; giving users complete intelligence over their own system.

Commenix: AI-Powered DX Tooling

2026

A VS Code extension that reads your staged code changes and automatically writes perfect Git commit messages that support multiple AI models.

Intellenix: AI Mobile App Assistant

2026

Built a cross-platform assistant that rejects the "generalist" approach. Instead of knowing a little about everything, Intellenix is engineered to go deep into specific domains and tasks, providing high-level expertise where general AI usually fails.

Enterprise Management Platform

2026

Built a massive management suite for educational institutes, running natively on Mac, Windows, and Linux

High-Performance AI CLI

2026

Built a lightning-fast AI interface that prioritizes memory safety and sub-millisecond response times.

Volunteer

Project Sloth

2026 - present

Core member of 1k+ followed organization on GitHub and 14k+ Discord members, shipped open source products used by thousands of game servers and tens of thousands of players.

Education

Tayeb Mohammed Boucena

Associate

Computer Science

Algeria, Algiers, Hussein Dey • 2025 - 2027

Concentration in enterprise web and mobile production quality development.
