

Siagh Marouane

Full-Stack AI Engineer

✉ contact@lenix.dev ☎ +213 549131811 📍 Algeria, Algiers

🌐 lenix.dev 🐙 github.com/jonahmr1

☰ Summary

Self-taught full-stack engineer who ran a software business serving 20+ clients, now building AI products (local vision agents, LLM-powered dev tools). Focused on performance, architecture, and shipping things that work.

📁 Experience

LenixM 2024 – Feb 2026

Founder

Launched a store that sells premium FiveM scripts and a community where developers learn from each other. Served 20+ clients, 30+ scripts shipped and 500+ members. Delivered full-stack game server end-to-end builds, custom mechanics, server troubleshooting and mentoring new developers.

<> Projects

Sysenix: AI Agent 2026 – Present

AI agent that understands and controls your machine using local AI vision, giving users complete intelligence over their own system.

Commenix: AI VSCode Extension 2026 – Present

VS Code extension that generates Git commit messages from staged changes, with support for multiple AI models.

Tonelix: AI-Powered Music App 2026 – Present

Music web app that uses AI to organize playlists and recommend music based on listening preferences.

🤝 Volunteer

Project Sloth 2026 – Present

Joined as a core member of an open-source organization (1k+ GitHub followers, 14k+ Discord members) building tools used by thousands of game servers.

🎓 Education

Tayeb Mohammed Boucena Associate

Computer Science Algeria, Algiers, Hussein Dey • 2025 – Present

Concentration in enterprise web and mobile production quality development.
